List of tables

Table 1: Impact assessment for CFA 15	2
---------------------------------------	---

1 **Introduction**

1.1 **Structure of the cultural heritage appendices**

- 1.1.1 The cultural heritage appendices for the Greatworth to Lower Boddington community forum area (CFA15) comprise:
- baseline reports (Volume 5: Appendix CH-001-015);
 - a gazetteer of heritage assets (Volume 5: Appendix CH-002-015);
 - an impact assessment table (this appendix);
 - survey reports (Volume 5: Appendix CH-004-015); and
- 1.1.2 Maps referred to throughout the cultural heritage appendices are contained in the Volume 5, Cultural Heritage Map Book.

1.2 **Impact assessment**

- 1.2.1 Table 1 presents information on the impacts on all identified heritage assets and the likely resultant environmental effects, taking into account agreed mitigation measures. Details on the assignment of values and the assessment of the scale of impacts are set out in the Scope and Methodology Report (Volume 5: Appendix CT-001-000/1) and the Scope and Methodology Report Addendum (Volume 5: Appendix CT-001-000/2).

Table 1: Impact assessment for CFA 15

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB001	Parish boundary (Brackley with Greatworth)	None	Not Significant	The asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be affected.	No change	Neutral	No impact on value.	No change	Neutral
GLB002	Parish boundary (Radstone with Greatworth)	None	Not Significant	Removal of portion of parish boundary within land required, temporarily or permanently, for construction of the Proposed Scheme on viaduct with balancing ponds and landscaping. This will be a permanent change that will have no appreciable impact on the value of the asset.	Minimal adverse	Negligible	The construction effect remains and there will be no further impact.	No change	Neutral
GLB003	Park pale of the medieval hunting park at Greatworth	None	Low	Removal of portion of park pale within land required, temporarily or permanently, for construction of the Proposed Scheme with landscaping and overbridge. This will be a permanent change that will not appreciably alter the value of the asset.	Low adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB004	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLB005	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLB006	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLB007	Cropmarks south of Halse Copse South	None	Moderate	Buried archaeological remains related to cropmarks south of Halse Copse South that may indicate prehistoric and/or Romano-British activity (GLB007) will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will noticeably affect the ability to understand this asset.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB008	Ridge and furrow west of Halse Copse South	None	Low	Removal of approximately 20% of the asset within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will slightly affect the significance of the asset.	Low adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB009	Former agricultural building to the south of Halse Copse	None	Not Significant	Buried remains will be removed within land required, temporarily or permanently, for construction of the Proposed Scheme. This will destroy the asset.	High adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLBo10	Halse Copse South	Ancient woodland	High	Approximately 5% of the ancient woodland of Halse Copse South South (GLBo10), an asset of high value will be removed through the construction of a cutting, a new farm overbridge and the establishment of temporary excavated material storage and haul road. This will include most of the western boundary of the wood, including potential wood bank(s). Buried archaeology within the woodland will also be removed. This will result in a noticeable change to the value of the asset. The setting of the woodland is not a contributing factor to the value as ancient woodland is nearly always a surviving fragment of a much larger, since lost, landscape, and hence the agricultural surrounds are rarely contemporary. Its value will not be appreciably changed.	Medium adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo11	Halse Copse Farm	None	Low	Construction of the Proposed Scheme will intermittently change the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context. The Proposed Scheme will be in cutting resulting in no appreciable impact on the setting and value of this asset.	Temporary low adverse Permanent minimal adverse	Temporary minor adverse Permanent negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo12	Buildings south of Halse Copse North	None	Not Significant	Buried remains will be removed within land required, temporarily or permanently, for construction of the Proposed Scheme.	High adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo13	Buildings in Greatworth Fields	None	Not Significant	Construction will not affect the fabric, setting or appreciation of the asset to a degree that detracts from its value.	No change	Neutral	No impact on value.	No change	Neutral
GLBo14	Buildings at Greatworth Fields		Low	Construction of the Proposed Scheme will intermittently change the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context. The Proposed Scheme will be in cutting resulting in no appreciable impact on the setting and value of this asset.	Temporary low adverse Permanent minimal adverse	Temporary minor adverse Permanent negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo15	Halse Copse North	Ancient woodland	High	The setting of the woodland is not a contributing factor to the value as ancient woodland is nearly always a surviving fragment of a much larger, since lost landscape, and hence the agricultural surrounds are rarely contemporary. Its value will not be changed.	No change	Neutral	No impact on value.	No change	Neutral
GLBo16	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLBo17	Hedgerow	Historically important hedgerow	Moderate	A section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo18	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLBo19	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLBo20	Bungalow Farm	None	Not Significant	Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context. The Proposed Scheme will be in cutting resulting in no appreciable impact on the setting and value of this asset.	Temporary low adverse Permanent minimal adverse	Temporary minor adverse Permanent negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo21	Hedgerow	Historically important Hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo22	Greatworth Hall	One Grade II listed building	Moderate	Greatworth Hall (GLBo22) lies immediately adjacent to the land required, temporarily or permanently, for construction of the Proposed Scheme with the route in cutting within 50m. Construction activities associated with construction of the Proposed Scheme in cutting, the excavation of balancing ponds, construction of Footpath AN22 Overbridge and landscaping will be immediately adjacent to the south of Greatworth Hall. The construction works will take place over three years. The construction works will comprehensively change views from the front of the house across the associated agricultural landscape to its south that forms a critical aspect of its setting and contributes to its value. Greatworth Hall will have its setting changed by construction of the Proposed Scheme adjacent to its grounds. The Proposed Scheme will effectively sever this asset from its rural hinterland to the south and links (both physical and visual) with Greatworth (GLBo29). In addition a section of ridge and furrow (GLB217) that provides time depth to the landscape immediately adjacent to Greatworth Hall will be removed. This will comprehensively alter Greatworth Hall's relationship with the rural agricultural landscape in which it developed.	Temporary high adverse Permanent high adverse	Temporary major adverse Permanent major adverse	Greatworth Hall will experience a change in setting during the operational phase. This change will be caused by the movement of trains and the associated increase in noise. This will constitute a medium adverse impact resulting in a moderate adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse Combined high adverse	Operational moderate adverse Combined major adverse
GLBo23	Hedgerows	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB024	Northampton and Banbury Junction Railway	None	Low	Removal of section of the disused railway line within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB025	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB026	Hedgerow	Historic hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB027	Hedgerow	Historic hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB028	Fields to east of Greatworth	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB029	Greatworth	Conservation area One Grade II* listed building 22 Grade II listed buildings	High	<p>The historic settlement of Greatworth (GLB029), which has an asset grouping of high value comprising its conservation area, Grade I listed church and 22 Grade II listed buildings, will have views across its associated historical landscape (GLB220) changed. This landscape forms a critical aspect of Greatworth's setting, placing it within a clearly legible historical landscape context dating to at least 1634. This association will be interrupted by construction of the Proposed Scheme in the Greatworth south cutting and the Greatworth green tunnel. Construction will be undertaken over three and a half years.</p> <p>Greatworth will have views to and from its eastern periphery towards the Proposed Scheme approximately .600m distant changed, as well as a degree of severance of the settlement from its rural hinterland on its north and north-eastern side. A section of the 17th century enclosed landscape (GLB220) that provides historical legibility to setting and hence contributes to the value of Greatworth will also be removed.</p> <p>These changes will noticeably affect the ability to appreciate this asset within its historical landscape context.</p>	Temporary medium adverse	Temporary major adverse	Greatworth will experience a change in setting during the operational phase. This change will be caused by the movement of trains and the associated increase in noise. This will constitute a medium adverse impact resulting in a moderate adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse	Operational moderate adverse
					Permanent medium adverse	Permanent major adverse		Combined high adverse	Combined major adverse
GLB030	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB031	Hedgerow	Historic hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB032	Ridge and furrow north of Greatworth	None	Low	Approximately 50% of this asset will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will result in a noticeable change to the significance of the asset.	Medium adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB033	Parish boundary (Greatworth with Marston St Lawrence)	None	Not Significant	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB034	Multi-period archaeology in the fields north of Greatworth Hall	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB035	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLB036	Greatworth Park	None	Moderate	The wireless intercept and transmission station buildings will be demolished within the land required, temporarily or permanently, for construction of the Proposed Scheme and buried remains of other elements of the station or any earlier buried archaeological remains removed. This will destroy the asset.	High adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB037	Stuchbury Hall Farm	None	Low	Construction will not affect the fabric, setting or appreciation of the asset to a degree that detracts from its value.	No change	Neutral	No impact on value.	No change	Neutral
GLB038	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLB039	Fields at Stuchbury Manor Farm	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB040	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB041	Hedgerow	historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB042	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB043	Ridge and furrow west of Greatworth Park	None	Low	Approximately 50% of this asset will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will noticeably change the value of the asset and remove it as an element within the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Minor adverse	The construction effect remains and there will be no further impact	No change	Neutral
GLB044	Hedgerow GLB25	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB045	Hedgerow GLB32	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB046	Hedgerow GLB32	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB047	Hedgerow GLB33 & 34	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove an element of the 17th century enclosures around Greatworth (GLB220).	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB048	Agricultural buildings at Old Barn Spinney	None	Not Significant	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB049	Saxon cemetery to east of Marston Hill Farm	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB050	Potential archaeology near Dean Barn	None	Moderate	Archaeological remains will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme such that their value will be noticeably affected.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB051	Prehistoric flint scatter to west of Moreton Road	None	Moderate	Archaeological remains may be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme such that their value will be noticeably affected.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB052	Marston Hill Farm	One Grade II listed building	Moderate	Construction activities associated with the scheme may result in a noticeable change to the existing local sound environment. This change will not appreciably affect the value of the asset. The Proposed Scheme will be in the Greatworth Green Tunnel. There will be no effects on its value.	Temporary low adverse Permanent no change	Temporary minor adverse Permanent neutral	The construction effect remains and there will be no further impact.	No change	Neutral
GLB053	Hedgerow	None	Low	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLBo54	Hedgerow	None	Low	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo55	Parish boundary (Greatworth with Sulgrave)	None	Not Significant	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo56	Cropmarks west of Moreton Road	None	Moderate	Buried archaeology in the location of cropmarks between Moreton and Banbury Roads (GLBo61) will be removed during construction within the land required, temporarily or permanently, for construction of the Proposed Scheme. Construction here will entail establishment of temporary haul routes, establishment of temporary roadhead, establishment of temporary spoil storage and construction of the route within cutting with balancing pond and landscaping.	High adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo57	Marston St Lawrence	Conservation area One Grade II* listed building 22 Grade II listed buildings	High	Marston St Lawrence lies almost 2km from the Proposed Scheme. Construction activities associated with the scheme will noticeably change the existing local sound environment but this will not appreciably affect its value. The Proposed Scheme will be in the Greatworth Green Tunnel. There will be no effects on its value.	Temporary minimal adverse Permanent No change	Temporary minor adverse Permanent Neutral	No impact on value.	No change	Neutral
GLBo58	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo59	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo60	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo61	Cropmarks between Moreton and Banbury Roads	None	Moderate	Buried archaeology in the location of cropmarks between Moreton and Banbury Roads (GLBo61) will be removed during construction within the land required, temporarily or permanently, for construction of the Proposed Scheme. Construction here will entail establishment of temporary haul routes, establishment of temporary roadhead, establishment of temporary spoil storage and construction of the route within cutting with balancing pond and landscaping.	High adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo62	Former building between Banbury and Moreton Roads	None	Not Significant	Buried remains will be totally removed within land required, temporarily or permanently, for construction of the Proposed Scheme. This will destroy the asset.	High adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLBo63	Magpie Farm	None	Low	<p>The setting of this asset will be changed by the visibility of construction activities including establishment of a temporary roadhead within 300m. This will change our ability to appreciate and understand the asset within its historical landscape context and setting.</p> <p>The Proposed Scheme will be in cutting resulting in no appreciable impact on the setting and value of this asset.</p>	<p>Temporary medium adverse</p> <p>Permanent minimal adverse</p>	<p>Temporary minor adverse</p> <p>Permanent negligible adverse</p>	The construction effect remains and there will be no further impact. GLBo70	Parish boundary (Sulgrave with Culworth)	None	Not Significant	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will have no appreciable effect on the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo71	Hedgerow	Historically important hedgerow	Moderate	Section of hedgerow will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo72	Deserted medieval settlement around Costow House	None	Moderate	Archaeological remains will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will remove a small (approximately 10%) portion which will slightly affect the value of the asset.	Low adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo73	Farm south of Costow House	None	Low	Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context. The Proposed Scheme will be in cutting resulting in no appreciable impact on the setting and value of this asset.	Temporary low adverse Permanent minimal adverse	Temporary minor adverse Permanent negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo74	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used	Number not used
GLBo75	Parish boundary (Marston St Lawrence with Thorpe Mandeville)	None	Not Significant	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will result in no appreciable change to the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo76	Parish boundary (Thorpe Mandeville with Thenford)	None	Not Significant	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no effect on its value.	No change	Neutral	No impact on value.	No change	Neutral
GLBo77	Barn near Happy Lands	None	Not Significant	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme. There will be no effect on its value.	No change	Neutral	No impact on value.	No change	Neutral
GLBo78	Fishponds between Costow House and Thorpe Mandeville	None	Moderate	Buried archaeological remains of the system of medieval fishponds between Costow House and Thorpe Mandeville (GLBo78) will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. Construction will entail construction of the route on embankment. This will also disrupt the integrity and legibility of the Thorpe Mandeville and Lower Thorpe landscape (GLB224) to which it contributes value. This asset will be severed by the Proposed Scheme on the Thorpe Mandeville Viaduct and Thorpe Mandeville South Embankment. This will also disrupt the understanding and appreciation of the Thorpe Mandeville and Lower Thorpe landscape component (GLB224). This will have a noticeable effect on this asset's value.	High adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLBo79	Banbury Road	None	Low	Construction will not affect the fabric, setting or appreciation of the asset to a degree that detracts from its value.	No change	Neutral	No impact on value.	No change	Neutral
GLBo80	Thorpe Mandeville	Conservation area	High	The historical landscape context of the hamlet at Thorpe Mandeville (GLBo80) will be disrupted during construction of the Proposed Scheme on embankment and the Lower Thorpe Viaduct beside which it is situated. Construction will take place over a period of two years. This will entail disruption of the agricultural landscape in which the village lies, and which provides a setting with historical legibility that adds to the village's value. This will include the imposition of construction activities within the heart of the historical landscape associated with Lower Thorpe and Thorpe Mandeville (GLB224). The changes in the setting (including introduction of intermittent construction noise) will be particularly noticeable from the peaceful churchyard of the Grade I listed Church of St John the Baptist.	Temporary medium adverse	Temporary major adverse	The village of Thorpe Mandeville) lies within an area identified as being subject to operational noise from passing trains.. Trains will also be visible on the Lower Thorpe Viaduct from the Grade I listed Church of St John the Baptist. This will constitute a medium adverse impact resulting in a major adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse	Operational major adverse
		One Grade I listed building One Grade II* listed building Six Grade II listed buildings		Thorpe Mandeville will have partial views towards the Proposed Scheme, approximately. 200m distant from its northern periphery. This will particularly be the case from the churchyard of the Grade I listed Church of St John the Baptist. There will also be open views towards the village across the line of the Proposed Scheme on the Lower Thorpe Viaduct and Lower Thorpe North and South Embankments from public footpaths and the scheduled monument of a mound approximately. 50m from the Proposed Scheme at Lower Thorpe to the north. This will result in severance of the historic landscape component (GLB224) between Thorpe Mandeville and the adjoining hamlet of Lower Thorpe (GLBo86) and dislocation of views towards more distant Culworth (GLB118). This will noticeably affect the ability to understand the asset within its historic landscape context.	Permanent medium adverse	Permanent major adverse		Combined high adverse	Combined major adverse
GLBo81	Ridge and furrow north of Thorpe Mandeville	None	Moderate	Approximately 20% of this asset will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will also remove part of an element of historic landscape component (GLB224) that constitutes part of the setting that contributes to the value of Thorpe Mandeville (GLBo80) and Lower Thorpe (GLBo86). This will noticeably affect the value of this and in combination with other losses of landscape elements will affect the historical integrity of the Thorpe Mandeville and Lower Thorpe landscape (GLB224).	High adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLBo82	Ridge and furrow north-west of Thorpe Mandeville	None	Low/Moderate	Approximately 10% of this asset will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will slightly affect the value of the this asset and in combination with other losses of landscape elements will affect the historical integrity of the Thorpe Mandeville and Lower Thorpe landscape (GLB224).	Low adverse	Minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact

				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB108	Edgcote Battlefield	Registered battlefield	High	The Edgcote Battlefield will have construction activities within its eastern edge for a period of two years. The eastern edge of the battlefield is a focus for any understanding of the battle as it is the direction from which the rebel reinforcements that turned the day against the Royalist forces arrived and it is along this side of the battlefield that the Battlefields Trail (the principal route from which the battlefield can be appreciated) is routed. The battlefield lies within an agricultural landscape which contributes further to its value. Construction of the Proposed Scheme will disrupt this setting and sever access to the battlefield from its eastern side through temporary closure of a section of the Battlefields Trail.	Temporary high adverse	Temporary major adverse	The Edgcote Battlefield will experience noise and visual intrusion from passing trains. This will constitute a medium adverse impact resulting in a major adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse effect resulting in a major adverse effect.	Operational medium adverse	Operational Major adverse
				Buried archaeology associated with the Battle of Edgcote as well as surviving elements of the medieval landscape across which it was fought (GLB108) will be removed through the construction of the route on the Culworth Embankment and in the Culworth Cutting and Edgcote South Embankment, Danesmoor ATS, Danesmoor ATS Satellite Compound, Bridleway AG10 Overbridge, balancing ponds, landscaping and the temporary establishment of excavated material storage and haul roads.	Permanent physical medium adverse	Permanent physical major adverse		Combined high adverse	Combined major adverse
				Key views across the battlefield at Edgcote (GLB108), an asset of high value, will be severed by the presence of the Proposed Scheme between the areas where the two armies deployed and probably fought and the higher ground towards Culworth where the rebel reinforcements arrived from. An area of ridge and furrow that will have existed when the battle was fought will also be removed resulting in the loss of an integral element of the landscape that would have been contemporary. These changes will noticeably alter the ability to understand and appreciate this asset within its historical landscape context.	Permanent setting medium adverse	Permanent setting major adverse

GLB127	Building to south of Wadground Barn	None	Not Significant	<p>Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context.</p> <p>The Proposed Scheme will be visible on the Edgcote Viaduct. This will have a noticeable effect on the ability to understand this asset within its historic landscape context.</p>	<p>Temporary low adverse</p> <p>Permanent low adverse</p>	<p>Temporary negligible adverse</p> <p>Permanent negligible adverse</p>	The construction effect remains and there will be no further impact.	No change	Neutral
GLB128	Parish boundary (Edgcote with Culworth)	None	Not Significant	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of this asset but will remove a small part of an element that contributes to the value of the Edgcote Battlefield landscape.	No change	Neutral	The construction effect remains and there will be no further impact.	No change	Neutral
GLB129	Ridge and furrow south of Trafford Bridge	None	High	Removal of approximately 50% of the ridge and furrow to the south of Trafford Bridge (GLB129), which is the only extant ridge and furrow within the area of and likely contemporary with the Battle of Edgcote will remove an integral element of the Edgcote Battlefield landscape (GLB108) and noticeably alter the ability to understand and appreciate it.	Medium adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB130	Culworth Mill	None	Low	<p>Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a noticeable effect on the ability to appreciate this asset within its historical landscape context.</p> <p>The Proposed Scheme will be visible on the Edgcote Viaduct. This will have a slight effect on the ability to understand this asset within its historic landscape context.</p>	<p>Temporary medium adverse</p> <p>Permanent low adverse</p>	<p>Temporary minor adverse</p> <p>Permanent minor adverse</p>	The construction effect remains and there will be no further impact.	No change	Neutral
GLB131	Buried archaeology and palaeo-environment at Trafford Bridge	None	Moderate	Buried archaeology including potential evidence for a medieval mill and palaeo-environmental evidence will be removed during construction of the Proposed Scheme, including a balancing pond and landscaping. This will noticeably alter the ability to understand this asset, and constitute a medium adverse impact and a moderate adverse effect.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB132	Trafford Bridge	One Grade II listed building	Moderate	The Grade II listed Trafford Bridge will be affected by construction of the Proposed Scheme within 50m of the asset, and use of the local road for construction traffic. Construction will take place over a period of approximately two years. This will disrupt the isolated agricultural landscape (which contributes to the value if the bridge) in which the bridge lies. This will block views from the bridge across the meadows and parkland in the valley floor to the west and interrupt views over the farmland and likely site of the Battle of Edgcote to the south. Construction of the Proposed Scheme will also change the nature of the setting which contributes to the appreciation and value of the asset.	Temporary high adverse	Temporary major adverse	Trafford Bridge will experience noise and visual intrusion from passing trains. This will constitute a medium adverse impact resulting in a moderate adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse	Operational major adverse
				The Edgcote Viaduct with Edgcote North and South Embankments will be almost adjacent to and blocking views from the bridge across the meadow and parkland landscape to the west that provides its historical landscape context. This landscape is broadly the same landscape as was present when the bridge was built. Views towards the probable site of the Battle of Edgcote to the south-west will also be blocked appreciably altering the view from the Battlefields Trail (a national heritage walking route) that uses the 18th century bridge to cross the Cherwell. This will comprehensively alter the ability to understand and appreciate this asset within its historical landscape context.	Permanent high adverse	Permanent major adverse		Combined high adverse	Combined major adverse
GLB133	Parish boundary (Chipping Warden with Culworth)	None	Low	Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB134	Edgcote House Park	None	High	<p>The historic landscape of Edgcote Parkland will have construction activities within its eastern boundary and specifically within the probably designed view across it to the agricultural landscape beyond from Edgcote House (GLB141) and from a possible designed reveal of the House at Trafford Bridge (GLB132). Construction will take place over a period of approximately two years. The peaceful nature of the parkland is a key aspect of its value and will be changed during the construction phase. The eastern edge of the parkland will be severed altering the value of the asset.</p> <p>The designed landscape will be subject to severance at its eastern side and a section of Oisierbed Spinney that constitutes a designed element of the parkland will be removed. Oisierbed Spinney also serves to frame the northern side of what is likely to have been a designed view from Edgcote House (GLB141) over the parkland and beyond. The isolated and peaceful nature of the parkland which is an important aspect of its design and appreciation will also be disrupted. The Edgcote Viaduct and North and South Embankments will also sever the connection of this parkland with the historically legible landscape between Trafford Bridge and Trafford (GLB226) to the east which extends the system of ponds and leats that were developed into ornamental lakes at Edgcote along the Cherwell Valley to Trafford (GLB146).</p> <p>These changes will noticeably alter the ability to understand this asset within its historical landscape context.</p>	<p>Temporary medium adverse</p> <p>Permanent medium adverse</p>	<p>Temporary major adverse</p> <p>Permanent major adverse</p>	<p>The Edgcote House Parkland will experience noise and visual intrusion from passing trains. This will constitute a medium adverse impact resulting in a major adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.</p>	<p>Operational medium adverse</p> <p>Combined high adverse</p>	<p>Operational major adverse</p> <p>Combined major adverse</p>
GLB135	Trafford Bridge Farm	Four Grade II listed buildings	Moderate	<p>Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context.</p> <p>The asset is screened from views towards the Proposed Route. There will be no change in its setting that appreciably affects its value.</p>	<p>Temporary low adverse</p> <p>Permanent minimal adverse</p>	<p>Temporary minor adverse</p> <p>Permanent negligible adverse</p>	<p>The construction effect remains and there will be no further impact.</p>	No change	Neutral
GLB136	Estate buildings, kitchen garden, lake and dam at Edgcote	Two Grade II listed buildings	Moderate	<p>Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context.</p> <p>The asset is screened from views towards the Proposed Route. There will be no change in its setting that appreciably affects its value.</p>	<p>Temporary low adverse</p> <p>Permanent minimal adverse</p>	<p>Temporary minor adverse</p> <p>Permanent negligible adverse</p>	<p>The construction effect remains and there will be no further impact.</p>	No change	Neutral
GLB137	Parish boundary (Edgcote with Chipping Warden)	None	Not Significant	<p>Removal of section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.</p>	Minimal adverse	Negligible adverse	<p>The construction effect remains and there will be no further impact.</p>	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB138	Edgcote Romano-British villa	Scheduled monument	High	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and as a buried archaeological asset with no upstanding remains it has no setting.	No change	Neutral	No impact on value	No change	Neutral
GLB139	Edgcote Drive Cottages (Snobs Row and Rags Row)	Two Grade II listed buildings	Moderate	Construction of the Proposed Scheme will intermittently change the nature of the agricultural landscape in which this asset lies over a period of approximately two years. This will have a slight effect on the ability to appreciate this asset within its historical landscape context. The asset is screened from views towards the Proposed Route. There will be no change in its setting that appreciably affects its value.	Temporary minimal adverse Permanent no change	Temporary minor adverse Permanent neutral	The construction effect remains and there will be no further impact.	No change	Neutral
GLB140	Wardington Gate Farm	One Grade II listed building	Moderate	Construction will not affect the fabric, setting or appreciation of the asset to a degree that detracts from its value.	No change	Neutral	No impact on value.	No change	Neutral
GLB141	Edgcote House and associated hamlet	Two Grade I listed buildings Eight Grade II listed buildings	High	Edgcote House and associated hamlet will be intermittently affected by construction activities within its setting over a period of approximately two years. Construction activities will be present within the key view from Edgcote House across its designed landscape towards Trafford Bridge. This will disrupt the ability to appreciate the quality of this historic landscape context. Edgcote House will have its setting changed by the introduction of the Proposed Scheme into the designed landscape associated with Edgcote House. A key view from the Grade I listed Edgcote House will be altered by the addition of the Edgcote Viaduct, Edgcote South Embankment, Edgcote North Embankment and landscaping within the designed landscape to its east. Parts of the designed landscape including Oisierbed Spinney that frames this view will also be removed and connection with the landscape of the Cherwell Valley beyond severed. There will be no appreciable effect on the value of any of the other buildings within this asset grouping. The changes will have a noticeable effect on the ability to understand and appreciate Edgcote House within its historic landscape context.	Temporary medium adverse Permanent medium adverse	Temporary major adverse Permanent major adverse	Edgcote House will experience noise and visual intrusion from passing trains. This will constitute a medium adverse impact resulting in a major adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse Combined high adverse	Operational major adverse Combined major adverse
GLB142	Edgcote Deserted Medieval Village	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and the setting will not be changed to an extent that alters its value.	No change	Neutral	No impact on value.	No change	Neutral
GLB143	Moated site south of Chipping Warden	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and the setting will not be changed to an extent that alters its value.	No change	Neutral	No impact on value.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB144	Blackgrounds	None	High	Buried remains associated with the adjacent scheduled monument of Edgcote villa (GLB138) (that lies just outside the land required, temporarily or permanently, for construction of the Proposed Scheme) will be removed through the construction of the Proposed Scheme on the Edgcote Viaduct, on the Edgcote North Embankment, Edgcote Cutting, balancing pond, landscaping and the establishment of temporary excavated material storage and haul routes. This will remove archaeological remains of a possible Romano-British roadside settlement and its probable Iron Age precursor. This will totally alter the ability to understand the asset.	High adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB145	Blackgrounds Farm	None	Low	The Proposed Scheme lies adjacent to this asset. The agricultural setting in which it lies will be intermittently changed over a period of approximately two years due to construction of the Edgcote North Embankment and the Edgcote Viaduct. This will noticeably alter the ability to appreciate this asset within its historic landscape context.	Temporary medium adverse	Temporary minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
				The Proposed Scheme will be visible adjacent to this asset on the Edgcote North Viaduct and Edgcote Viaduct. This will have a noticeable effect on the ability to understand this asset within its historic landscape context.	Permanent medium adverse	Permanent minor adverse			
GLB146	Cherwell Valley above Culworth Mill	None	Moderate	Buried archaeological remains within this asset lie outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be affected. Construction of the Edgcote Viaduct, Edgcote North and Edgcote South Embankments will be visible for a period of approximately two years and will alter the perception of rural isolation that contributes to the value of this asset as part of the landscape between Trafford Bridge and Trafford House (GLB226). This will slightly affect the ability to appreciate this asset within its historic landscape context.	Temporary low adverse	Temporary minor adverse	The construction effect remains and there will be no further impact.	No change	Neutral
				The Proposed Scheme will be partially visible on the Edgcote Viaduct and Edgcote North and Edgcote South Embankments. This will not appreciably affect the ability to understand and appreciate this asset within its historical landscape context.	Permanent minimal adverse	Permanent minor adverse

				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB208	Cropmarks to north of Three Shires	None	Moderate	Buried remains of likely prehistoric and/or Roman date associated with cropmarks to the north of Three Shires will be removed through landscaping and the establishment of temporary excavated material storage, haul roads and landscaping. This will noticeably affect the value of this asset	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB209	Former buildings north-east of Fox Spinney	None	Not Significant	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be impacted.	No change	Neutral	No impact on value.	No change	Neutral
GLB210	Parish and county boundary (Northamptonshire with Warwickshire and Boddington with Wormleighton)	None	Not Significant	Removal of a section of boundary within land required, temporarily or permanently, for construction of the Proposed Scheme. This will not appreciably affect the value of the asset.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB211	Cropmarks at Fox Covert	None	Moderate	Approximately 20% of the buried remains associated with this asset will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This will noticeably affect the value of the asset.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB212	Possible moated site south of Upper Boddington	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be impacted.	No change	Neutral	No impact on value.	No change	Neutral
GLB213	Cropmark of possible ring-ditch to north-west of Greatworth Hall	None	Moderate	Buried archaeological remains in the location of the cropmark of a possible ring-ditch to the north-west of Greatworth Hall and any associated surrounding remains will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. Construction at this location will include establishment of temporary haul route, establishment of temporary spoil storage, construction of the route in cutting, construction of the Greatworth ATS and landscaping.	High adverse	Major adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB214	Cropmark of possible ring-ditch to north of Greatworth Hall	None	Moderate	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be impacted.	No change	Neutral	No impact on value.	No change	Neutral
GLB215	Ridge and furrow between Halse Copse and Halse Copse North	None	Low	Approximately 10% of this asset will be removed during construction of the Greatworth South Embankment and establishment of landscaping. This will slightly affect the value of this asset.	Low adverse	Minimal adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB216	Ridge and furrow to the west of Bungalow Farm	None	Low	Approximately 10% of this asset will be removed during construction of the Greatworth South Embankment, establishment of landscaping and temporary access tracks. This will slightly affect the value of this asset.	Low adverse	Minimal adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB217	Ridge and furrow to the west of Greatworth Hall	None	Low	Removal of approximately 75% of the ridge and furrow to the west of Greatworth Hall (GLB217) within the land required, temporarily or permanently, for construction of the Proposed Scheme. This ridge and furrow also represents part of the historic landscape context for Greatworth Hall (GLBo22). This will also remove an element of the 17th century enclosures around Greatworth (GLB220). This will noticeably affect the ability to understand this asset within its historical landscape context.	High adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB218	Ridge and furrow to the north-east of Greatworth Hall	None	Low	This ridge and furrow to the north-east of Greatworth Park will be removed within the land required, temporarily or permanently, for construction of the Proposed Scheme. This ridge and furrow also constitutes part of the historic landscape context for Greatworth. This will remove an element of the 17th century enclosures around Greatworth (GLB220). This will noticeably alter the ability to appreciate this asset as part of the local historic landscape context.	High adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB219	Ridge and furrow to north-west of Stuchbury Manor Farm	None	Low	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be impacted.	No change	Neutral	No impact on value.	No change	Neutral
GLB220	17th century enclosures around Greatworth	None	Moderate	<p>Elements of this landscape component will be removed during construction of the Greatworth North Cutting, Greatworth Green Tunnel and establishment of landscaping. The lost elements will include four sections of ridge and furrow (GLBo32, GLBo43, GLB217 and GLB218) and nine sections of historically important hedgerow following field boundaries marked on the 1634 Greatworth Enclosure map (GLBo26, GLBo27, GLBo30, GLBo31, GLBo41, GLBo42, GLBo44, GLBo46 and GLBo47). This will noticeably change the legibility of this landscape component. The rural agricultural sense of this landscape will also be lost during the construction period and change its relationship with Greatworth (GLBo29) and Greatworth Hall (GLBo22).</p> <p>The historical integrity and coherence of this landscape will have been permanently changed during the construction phase noticeably affecting the ability to appreciate it as a heritage asset in its own right and its association with Greatworth (GLBo29) and in particular Greatworth Hall (GLBo22).</p>	<p>Temporary medium adverse</p> <p>Permanent medium adverse</p>	<p>Temporary moderate adverse</p> <p>Permanent moderate adverse</p>	The construction effect remains and there will be no further impact.	No change	Neutral
GLB221	Ridge and furrow between Costow House and Magpie Farm	None	Moderate	Approximately 20% of this landscape element will be removed during construction of the Thorpe Mandeville South Embankment and the asset effectively partitioned. This will affect both the value of this asset and the value of the Thorpe Mandeville and Lower Thorpe landscape that it forms an integral part of. This will noticeably alter the ability to appreciate this asset within a historic landscape context.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB222	Trackways and lynchets to north of Costow House	None	Moderate	Approximately 50% of this landscape element will be removed during construction of the Thorpe Mandeville South Embankment. This will affect both the value of this asset and the value of the Thorpe Mandeville and Lower Thorpe landscape (GLB224) that it forms an integral part of. This will noticeably alter the ability to appreciate this asset within a historic landscape context.	Medium adverse	Moderate adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB223	Early field boundary at Lower Thorpe	None	Low	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be subject to impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB224	Thorpe Mandeville and Lower Thorpe Landscape	None	Moderate	<p>This landscape will be altered by insertion of the scheme on the Lower Thorpe North and South Embankments and Lower Thorpe viaduct across its centre. Elements of this historic landscape component will be removed or altered. This will include demolition of Lower Thorpe farmhouse and associated buildings within its grounds (GLBo86), removal of sections of the water management systems within the valley to the east of Lower Thorpe (GLBo85) and valley between Costow and Thorpe Mandeville (GLBo78), removal of sections of ridge and furrow (GLBo81, GLBo82 and GLB221) and removal of sections of historically important hedgerows (GLBo90, GLBo91, GLBo93 and GLB100). This will noticeably affect the ability to understand and appreciate this asset as a historic landscape component and its contribution towards the assets for which it provides a historical landscape context.</p> <p>The Lower Thorpe South Embankment, Lower Thorpe Viaduct and Lower Thorpe North Embankment will permanently partition this landscape in two and their visibility within and across the landscape will comprehensively change the ability to understand and appreciate its historic context.</p>	High adverse	Major adverse	The Thorpe Mandeville and Lower Thorpe landscape will experience noise and visual intrusion from passing trains. This will constitute a medium adverse impact resulting in a moderate adverse effect. In combination with the permanent construction impacts of the Proposed Scheme this will result in a high adverse impact resulting in a major adverse effect.	Operational medium adverse Combined high adverse	Operational moderate adverse Combined major adverse
GLB225	Ridge and furrow at Culworth Mill	None	Low	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be subject to impact.	No change	Neutral	No impact on value.	No change	Neutral

Unique identifier	Name	Designation(s)	Value	Construction impact			Operation impact		
				Nature of impact including mitigation	Scale of impact	Effect	Nature of impact including mitigation	Scale of impact	Effect
GLB226	Trafford Bridge to Trafford House landscape component	None	Moderate	<p>Construction of the Edgcote South Embankment, Edgcote Viaduct and Edgcote North Embankment will disrupt the connection between this landscape component and the landscape within the Edgcote Parkland (GLB134) to the west. The connection with the Edgcote Battlefield (GLB108) landscape will also be disrupted. This will noticeably alter the ability to understand and appreciate how these landscapes interact, specifically at the focal point of Trafford Bridge (GLB132).</p> <p>The Edgcote Viaduct will frame the western edge of this landscape component and serve as a backdrop to views from it towards Trafford Bridge. The connection with the Edgcote Parkland (GLB134) landscape beyond will remain severed and the connection to the Edgcote Battlefield disrupted. This will noticeably affect the appreciation of this asset as part of the historic landscape context of this portion of the Cherwell Valley.</p>	<p>Temporary medium adverse</p> <p>Permanent medium adverse</p>	<p>Temporary moderate adverse</p> <p>Permanent moderate adverse</p>	The construction effect remains and there will be no further impact.	No change	Neutral
GLB227	Ridge and furrow to south of Blackgrounds Farm	None	Low	This asset lies outside of the land required, temporarily or permanently, for construction of the Proposed Scheme and will not be subject to impact.	No change	Neutral	No impact on value.	No change	Neutral
GLB228	Lower Boddington Landscape	None	Moderate	<p>Construction of the Lower Boddington Cutting will occur within this landscape component changing the isolated agricultural nature of the component and disrupting its connection with the medieval village earthworks at Lower Boddington (GLB201). Elements of ridge and furrow (GLB189 and GLB199) will be removed along with sections of Historic hedgerow (GLB185, GLB186, GLB187 and GLB188) This will noticeably change this landscape and its association with Lower Boddington to a degree that will affect its value.</p> <p>These changes in the historical integrity of this landscape will be permanent and noticeably affect the ability to understand and appreciate it.</p>	<p>Temporary medium adverse</p> <p>Permanent medium adverse</p>	<p>Temporary moderate adverse</p> <p>Permanent moderate adverse</p>	The construction effect remains and there will be no further impact.	No change	Neutral
GLB229	Moreton Road	None	Low	Construction of the Proposed Scheme will not appreciably affect the ability to understand and appreciate this asset as a historic routeway.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB230	Banbury Road	None	Low	Construction of the Proposed Scheme will not appreciably affect the ability to understand and appreciate this asset as a historic routeway.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB231	Banbury Road (north of Magpie Farm)	None	Low	Construction of the Proposed Scheme will not appreciably affect the ability to understand and appreciate this asset as a historic routeway.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
GLB232	Helmdon Road	None	Low	Construction of the Proposed Scheme will not appreciably affect the ability to understand and appreciate this asset as a historic routeway.	Minimal adverse	Negligible adverse	The construction effect remains and there will be no further impact.	No change	Neutral
